

CU-500 CONTROL UNITS

CU-500 CONTROL UNIT

Control Unit, Power Supply, Video Overlay, Footage Counter, and Camera Controller with Industrial Switchbox

CU-500 CONTROL UNIT SPECIFICATIONS

Depth Counter: On-screen depth display measured in feet and tenths, or meters. Counter can be Preset, Reset, Calibrated, and Relocated On-screen

Power Input: 120/220 VAC, 50/60 Hz Specified at time of Order

Power Output: Adjustable DC Output up to 180 VDC

Controls: Industrial Finger Operated Switchbox

LCD Display: Camera Current (AMPS) and Camera Voltage (VDC)

LED Indicator Lights: Power, +/- 12 VDC and 5 VDC

Video Output: BNC Twist Lock Composite Video

Winch Output: Laval 7-Pin Control Cable with Amphenol 7-Pin locking connector

CU500 FEATURES

The newly released CU500 is the latest technology for the control unit for our large deep water systems. It serves as the video source, power supply, functions controller and counter for our deep water systems. The control unit offers variable voltage to the well camera while displaying high voltage and camera current meters. The footage counter and video display can be calibrated in the field and allows the user to preset or reset the counter on the screen along with the ability to change the location of the numbers on the screen.

Note: Specifications subject to change. Confirm when ordering.
